Education

Shanghai Jiao Tong University

Master of Applied Statistics

Sep 2021 - June 2023

Cum. GPA. 3.63/4.0

Southern University of Science and Technology

Bachelor of Mathematics and Applied Mathematics

Sep 2017 - Jun 2021

Cum. GPA. 3.82/4.0

Research Experience

Multi-Robot System

Sep 2022 - Present

The Intelligent Robotics and Machine Vision Lab

Shanghai, China

- An integrated task assignment, path planning, and coordination problem was applied for large-scale robot networks with uncertainties, reaching multiple objectives.
- During multi-robot task allocation, prioritize tasks with significant influence on the entire system and formulate the problem of critical subset identification mathematically and statistically.
- Apply traffic flow learning to enhance large-scale Multi-Robot cooperative path planning under uncertainties.

Graph Neural Network

Sep 2021 - Apr 2023

Shanghai Jiao Tong University

Shanghai, China

- To address the sparsity of mutation datasets, design a graph denoising model to locate the best one or more mutation site(s) on proteins.
- Effectively reduce the cost of cancer diagnosis by integrating CNN and GNN to design a stomach disease detection model.
- Present a comprehensive review of biological molecules' representations, systems' representations, and geometric deep learning models at different levels.

Computer Vision

Sep 2020 - Jan 2022

Southern University of Science and Technology

Shenzhen, Guangdong, China

- Traffic Sign Detection and Recognition: Detect the locations of traffic signs in a video and identify their meaning in real time.
- Auto Color: Apply GAN to change the colors of different objects in a single image

Differential Equation

Sep 2019 - Jun 2021

Southern University of Science and Technology

Shenzhen, Guangdong, China

- Numerical Calculation on Fluid Partial Differential Equations.
- Ordinary Differential Equations on Infectious Disease Model: Build multiple ODE models to predict the number of people infected by different infectious diseases and make COVID-19 predictions.

Photoacoustic Imaging

Jun 2018 - Oct 2018

Southern University of Science and Technology

Shenzhen, Guangdong, China

Intern Experience

AI Software Intern

Oct 2021 - Mar 2022

Taize Chiptech

Shanghai, China

- ResNet-18 on FPGA: Design essential forward propagation functions and stack them to run on FPGA.
- VLIW Compiler Development: Cooperate with fulfilling AI operator library in assembly language.
- Fixed Issue: ResNet-18 running results on FPGA were inconsistent with those generated by PyTorch.

Awards & Honors

Academic Scholarship of Shanghai Jiao Tong University <i>Shanghai Jiao Tong University</i>	2021 - 2023
Outstanding Graduate of the Faculty of Science <i>Southern University of Science and Technology</i>	2021
Outstanding Graduate of the Mathematics Department <i>Southern University of Science and Technology</i>	2021
The first prize of SUSTech Outstanding Student Scholarship <i>Southern University of Science and Technology</i>	2019 - 2021
Sports Star of the Shuren College of SUSTech <i>Southern University of Science and Technology</i>	2020
Third Prize in Mathematical Contest in Modeling for Chinese University Students <i>China Association for Industrial and Applied Mathematics</i>	2019

Others

- **Programming Languages:** Python, R, Matlab, C, C++, Java, Julia,
- **Athletics:** Member of the Women’s Soccer Team of SJTU, Captain of the Women’s Soccer Team of SUSTech Shuren College.
- **WFAXSJTU Club Organizer:** We are the first team in China to promote walking soccer, a sport similar to soccer but forbidden from running. We established the club to attract people with relative physical strength, such as senior citizens, to exercise more through soccer.
